

Devil's Canyon Brewery

Tap Tail Directions

First off, Congratulations on your Astute, Cultivated Taste. Well Done!

Start by holding the vinyl laminate up to the area you intend to apply it to.

- Is it aesthetically pleasing?
- Does it make your heart go pitter patter?

Next, carefully remove the solid backing – *not* the masking tape-like side.

- Its easier to start peeling from the circle side, but either end works

Apply the vinyl laminate – wait – did we mention that you should clean the area you are applying it to first? Mea Culpa.

- Gently rub the laminate on with a soft cloth, your shirt tail, a tribble, etc.
- Try to get any bubbles out but don't obsess over it. As the sun heats the laminate up over the next few weeks the small bubbles will disappear.

For maximum visual impact, gently remove the masking tape-like backing

Stand Back, put your hands on your hips and revel in your mad sKiLz!

- Call Neighbors. Gloat.
- Show Spouse. Say "See! Nice Huh! Yaaaaah . . ."
- Drink some beer / root beer from your growler*, nod slowly and smile a lot.

Thank you for supporting Devil's Canyon Brewery and the Bars and Restaurants that Serve our Award-Winning, Handcrafted Beers and Root Beer.
